Transmitter signs: classifier errors stay below break-even; glutamate's sign may not
Transmitter classifier errors (share of signed neurons flipped)
FAFB matrix, per neuron (1.1%)
FAFB matrix, per cell type (1.2%)
Hemibrain matrix, per neuron (3.5%)
Hemibrain matrix, per cell type (3.4%)
Glutamate made excitatory
10% of receiving cell types
15% of receiving cell types
20% of receiving cell types
25% of receiving cell types
25% of sending cell types
